PROFESSIONAL SUMMARY

Computer Science Engineering (AI) student with strong foundations in **Data Structures, Algorithms, Software Development, and Database Systems**, and hands-on experience in building **full-stack applications** and **end-to-end machine learning systems**. Proficient in **Python, C++, Java, JavaScript, Scikit-learn, TensorFlow, Neural Networks, NLP**, with a strong focus on developing **practical, scalable, and real-time AI solutions**

EXPERIENCE

AI Intern

Dec 2025 – Feb 2026

Infosys Springboard 6.0 | Remote

- Built an **AI-powered Code Quality Analyzer** using **Python, AST-based static analysis, and rule-based checks** to detect maintainability, complexity, and common code-quality issues before code is committed.
- Added **complexity metrics, maintainability scoring, and LLM-based suggestions** to provide actionable feedback for improving code readability, reliability, and overall software quality.
- Designed a complete workflow with **Streamlit UI, CLI support, report export, and Git pre-commit hook integration** to automate code review and improve developer productivity.

Web Development Intern

Jul 2025 – Aug 2025

KistechnoSoftware

- **Developed a full-stack Expense Tracker application** using HTML, CSS, Bootstrap, JavaScript, MySQL, and Supabase to manage income, expenses, and financial records through an interactive dashboard.
- **Implemented user authentication, transaction management, and automated reporting features** with database integration to ensure secure data storage and efficient financial record management.

PROJECTS

SafeQR – QR Code Safety Scanner | Python, Streamlit, Random Forest, OpenCV |

June 2026

- Developed a **Streamlit-based QR security scanner** to classify QR-linked URLs as safe or phishing/malicious using a hybrid **machine learning + rule-based detection** pipeline.
- Implemented a **multi-library QR decoding workflow** using **zxing-cpp, pyzbar, and OpenCV** with fallback strategies for reliable decoding across varied image formats and low-quality scans.
- Built a phishing detection system using **URL feature engineering, Random Forest classification, and rule-based safety checks** including HTTPS validation, suspicious TLD detection, keyword analysis, and IP-based URL detection.
- **Added UPI safety analysis, confidence scoring** to provide interpretable security insights for end users.

Expense Tracker Application | HTML, CSS, Bootstrap, JavaScript, MySQL, Supabase |

Jun – Jul 2025

- **Developed a full-stack Expense Tracker application** to manage user-specific income, expenses, and financial records through an interactive dashboard and transaction workflows.
- **Implemented secure authentication, CRUD-based transaction management, and automated reporting features** to support efficient expense tracking and personalized financial insights.
- **Integrated Supabase-backed storage and built a responsive multi-page dashboard** with balance, income, expense, transaction history, and account management views for seamless financial data management and monitoring.

TECHNICAL SKILLS

- **Languages:** Python, C++, C, Java, SQL
- **AI/ML:** TensorFlow, Keras, Scikit-learn, Neural Networks, NLP, TF-IDF, Word2Vec, OpenCV, NLTK
- **Web Technologies:** HTML5, CSS3, JavaScript, Bootstrap, React, REST APIs
- **Tools & Platforms:** Git, GitHub, MySQL, Supabase, Streamlit, Jupyter Notebook, Google Colab, n8n
- **CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Software Design

EDUCATION

B.Tech, Computer Science Engineering (Artificial Intelligence)

2024 –2028

Swami Keshvanand Institute of Technology, Management & Gramothan, Jaipur

CGPA: 9.68/ 10.0

CERTIFICATIONS & ACHIEVEMENTS

Certification:

- **Oracle Academy** — Artificial Intelligence with Machine Learning in Java (2026)
- **NPTEL**— Programming in Modern C++, Elite (2025) | Problem Solving Through Programming in C, Elite (2026)

Achievements: Awarded **Bronze Medal** for securing a 9.74 SGPA in Semester 2 at SKIT Jaipur
